Game Rules

Lightning Roulette is an exciting game with electrifying roulette experience. In each game round from one to five "Lightning numbers" are randomly struck by lightning, allowing you to win 50x up to 500x (49:1 — to 499:1).

The objective in **Lightning Roulette** is to predict the number on which the ball will land by placing one or more bets that cover that particular number. The wheel includes the numbers 1-36 plus a single 0 (zero).

After betting time has expired, one or more "lucky numbers" with "lucky payouts" are randomly selected and the ball is spun within the Roulette wheel. The ball will eventually come to rest in one of the numbered pockets on the wheel. The player wins if he/she has placed a bet that covers that particular winning number. If the winning number is among the randomly selected "lucky numbers" and is covered by the player's bet on a Straight Up bet, then the "lucky payout" is paid to the player.

Bet Types

You can place many different kinds of bets on the Roulette table. Bets can cover a single number or a certain range of numbers, and each type of bet has its own payout rate.

Bets made on the numbered spaces on the betting area, or on the lines between them, are called Inside Bets, while bets made on the special boxes below and to the side of the main grid of numbers are called Outside Bets.

INSIDE BETS:

- **Straight Up** - place your chip directly on any single number (including zero).
- **Split Bet** - place your chip on the line between any two numbers, either on the vertical or horizontal.
- **Street Bet** - place your chip at the end of any row of numbers. A Street Bet covers three numbers.

- **Corner Bet** - place your chip at the corner (central intersection) where four numbers meet. All four numbers are covered.
- **Line Bet** - place your chip at the end of two rows on the intersection between the two rows. A line bet covers all the numbers in both rows, a total of six numbers.

OUTSIDE BETS:

- **Column Bet** - place your chip in one of the boxes marked "2 to 1" at the end of the column that covers all 12 numbers in that column. The zero is not covered by any column bet.
- **Dozen Bet** - place your chip in one of the three boxes marked "1st 12," "2nd 12" or "3rd 12" to cover the 12 numbers alongside the box.
- **Red/Black** - place your chip in the Red or Black box to cover the 18 red or 18 black numbers. The zero is not covered by these bets.
- **Even/Odd** - place your chip in one of these boxes to cover the 18 even or 18 odd numbers. The zero is not covered by these bets.
- **1-18/19-36** - place your chip in either of these boxes to cover the first or second set of 18 numbers. The zero is not covered by these bets.

After the bets are closed the randomly selected “lucky numbers” with their “lucky payouts” will be highlighted on the betting grid.

Lightning Roulette € 5 – 1,000

To participate in the game, you must have sufficient funds to cover your bets. You can see your current BALANCE on your screen.

The TRAFFIC LIGHTS tell you the current status in the game round by informing you of when you can bet (GREEN light), when the betting time is nearly over (YELLOW light), and when betting time has expired (RED light).

The CHIP DISPLAY allows you to select the value of each chip you wish to bet. Only chips of denominations that can be covered by your current balance will be enabled.

Once you have selected a chip, place your bet by simply clicking/tapping the appropriate betting spot on the game table. Each time you click/tap

the betting spot, the amount of your bet increases by the value of the selected chip or up to the maximum limit for the type of bet you have selected. Once you have bet the maximum limit, no additional funds will be accepted for that bet, and a message will appear above your bet to notify you that you have bet the maximum.

NOTE: Please do not minimise your browser or open any other tab in your browser while betting time remains, and you have placed bets on the table. Such actions may be interpreted as leaving the game, and your bets will therefore be declined for that particular game round.

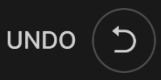

The DOUBLE (2x) button becomes available after you have placed any bet. Each click/tap doubles all your bets up to the maximum limit. Note that you must have a sufficient account balance to double ALL your placed bets.

The REPEAT button allows you to repeat all bets from the previous game round. This button is available only before the first chip is placed.

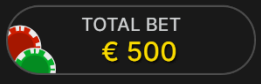

The UNDO button removes the last bet you placed.

You can click/tap the UNDO button repeatedly to remove bets, one by one, in the reverse order of which they were placed. You can clear all your bets by holding the UNDO button.

The TOTAL BET indicator displays the total amount of all bets placed in the current round.

Disconnection Policy

If you are disconnected from a game round, any placed bets remain valid and are settled in your absence. Upon reconnecting, you can view bet outcomes in the History window.

Autoplay

Once you have placed a bet, Autoplay allows you to repeat your selected bet or bets for a chosen number of game rounds.

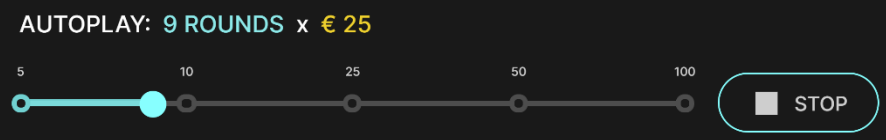

To start Autoplay, place your bets on the betting grid as usual and then click/tap the Autoplay button.

The Autoplay panel will then open, and from here you simply select the number of game rounds you would like your bet to be repeated in. Then click/tap START to Autoplay.

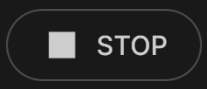

Your selected number of Autoplay rounds will be displayed in an indicator on the Autoplay button. The number of remaining Autoplay rounds will be updated, once Autoplay is started.

Your total Autoplay bet amount can be calculated by multiplying the number of your selected Autoplay rounds with the value of your total bet. Your remaining Autoplay limit can be calculated by multiplying the number of remaining Autoplay rounds with the value of your total bet per one round.

Your automatic game rounds will continue until either your chosen number of Autoplay rounds is complete, or you choose to stop Autoplay.

You can end Autoplay at any time by simply stopping Autoplay.

Placing additional bets on the betting grid or doubling your bets while Autoplay is running will also stop Autoplay.

More Games

The LOBBY button can be selected at any time from any game.

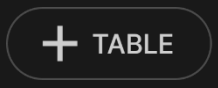

It allows you to easily change the game table or select any other live game. You will not be removed from this game until you have actually selected the new game/table you wish to join. You can use the LOBBY to browse other games while still playing in your current game.

Multi-Game Play

If you enjoy non-stop action, you can join up to four different game tables simultaneously and view them all in the same browser window!

After you have joined at least one game table, click on LOBBY. In the lobby or game, click the +TABLE button associated with that table to join it. (Certain tables may be unavailable for multi-game play and will therefore not display a +TABLE button).

After you have joined multiple tables, you will be able to resize your browser window as a whole, but you will not be able to resize each game table window separately.

You can exit any table without affecting your presence at other tables you have joined. To exit a table, click the X button.

Please note:

- You will exit a table automatically if you join the same table through a different device/browser.

- If you click directly on a table icon instead of the +TABLE button, you will merely *switch* tables instead of joining the chosen table *in addition* to the table you joined previously.

We kindly advise you to join only as many tables as your screen can accommodate while still allowing you to place bets deliberately and accurately.
